

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

August 11, 2006

TO: Parents or guardians of children enrolled at the following schools:

**Ellis Elementary School, Sunnyvale
Saint Martin School, Sunnyvale
Braly Elementary School, Sunnyvale**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #14373 for the following sources of air pollution:

**Soil Vapor Extraction System
Groundwater Treatment System
Former BP Service Station #11232
603 Old San Francisco Road, Sunnyvale**

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing contamination problem, a Dual-phase Extraction System has been proposed for this site. Underground storage tanks for the Service Station leaked gasoline into the surrounding soil and contaminated both the soil and groundwater. The tanks have since been removed from the site. On behalf of Atlantic Richfield Company, URS Corporation has proposed a system which will extract contaminated groundwater as well as petroleum vapors from wells drilled at the site. The organic contaminants will be removed from the groundwater by an airstripper, a device which bubbles air through the groundwater. Treatment of the vapor extracted directly from the soil, as well as that from the airstripper will be accomplished by two carbon adsorption vessels arranged in series.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:

PUBLIC COMMENT PERIOD

There is a 30-day period for public response to this proposal. If you wish to comment on the proposed project, you may do so in writing or by e-mail. Alternatively, you may call and leave a telephone message up to one minute in length. Please leave your name and telephone number so that a District staff member may respond to your message.

Please use the following contact information if you would like to comment on the proposed project:

Mailing address: Former BP Station #11232 Public Notice Response
BAAQMD
Engineering Division
939 Ellis Street
San Francisco, CA 94109
Attn: Robert Cave

E-mail address: rcave@baaqmd.gov

Telephone Number: (415) 749-5059

The public comment period for this project ends on **September 11, 2006.**
